The “Nominal Power” (Pnom) is labeled power output, expressed in Watt, as indicated in the nameplate of the Modules. The “Actual Power Output” means the power in Watt peak that the Module generates at a given points in time a year after Warranty Start Date under STC condition. “STC” conditions defined in IEC61215 are as follows: (a) Light spectrum of AM 1.5, (b) an irradiation of 1000 W per m2, and (c) a cell temperature of 25 degrees centigrade at normal irradiation. The measurements are carried out as per IEC 61215 as tested at the connectors or junction box terminals. In all measurements of actual power output, the effect of test uncertainty needs to be considered as per IEC 61215.

5. Remedies

In the event that the Modules fails to meet the warranties as described in Sections 3 or 4 above, only at the sole discretion of DMEGC Solar, a justified claim will be settled by either of the following warranty services:

- (1) Repair work; or
- (2) Delivery of additional Module to make up the extra power loss; or
- (3) Reimbursement of the difference in power (wattage difference) between the actual power output and the guaranteed power output set out in the Section 3 according to the market price (per watt) at the time DMEGC Solar received the warranty claim; or
- (4) Reimbursement of the purchase price, reduced by an annual, linear depreciation amount calculated on the basis of the warranty period set out in Section 3 (i.e. 30 or 25 years following the Warranty Start Date) of the original Modules that is subject to the warranty claim; or
- (5) Replacement of the defective Module or part thereof by new Module. DMEGC Solar has the right to deliver another type (different in size,

color, shape and/or power but with equivalent or higher power level) in case DMEGC Solar has discontinued producing the replaced Modules at the time of the claim.

DMEGC Solar shall, at its cost and expense, deliver the additional, repaired or replacement Modules based on the same Incoterms and destination that the Modules causing the breach of the Warranty were delivered under the modules supply agreement to which this Warranty apply. Any costs and expenses for the dismantling, removal, testing, packaging, installation or re-installation of the Modules shall be assumed by the Customer.

The settlement of a justified claim shall not constitute a renewal or extension of existing, statutory warranty claims or claims on the basis of the Warranty. Any replaced Modules shall become the property of DMEGC Solar made for their disposal. Unless instructed by DMEGC Solar otherwise, the Customer shall dispose of Modules in accordance with all local applicable regulations on electronic waste treatment and disposal at its own cost. Modules having been replaced shall not be sold, reworked or reused in any way, unless expressly authorized by DMEGC Solar.

That Warranty represents a voluntary service by DMEGC Solar. Any claims beyond the warranty services as set forth in this section, particularly regarding direct or indirect damage shall be excluded, to the extent permitted by law.

- (11) Any deterioration in appearance of the Module (including, but not limited to any scratches, stains, mechanical wear, rust, or mold), or any other changes to the Module which occur after delivery to the beneficiary, do not constitute a defect under the Product Warranty. A claim in the event of glass breakage arises only to the extent that there was no external cause of the breakage. Normal wear, i.e. wear caused by normal Module use, does not constitute a Product Warranty Event. The same applies in the event of discoloration of the Module;
